

## Tee 45° Injection molded

### Advantages & attributes:

#### Special design

- Injection molded fitting
- Perfect flow characteristics
- Butt- and electrofusion welding

#### Premium material PE 100-RC

- Resistance against slow crack growth
- Cost saving installation without sand bed

#### Premium material PP-R

- Outstanding temperature resistance
- Outstanding corrosion resistance
- Outstanding strength, stiffness & hardness

#### Guaranteed traceability of each part

- Batch number
- Traceability code PE 100-RC

For the creation of full pressure conform 45° branches in PE/PP piping systems the AGRU injection molded 45° Tee is now available. This special fitting is made of premium PE 100-RC / PP-R, guarantees a simple installation and absolute reliability. With an injection molded 45° Tee, creating a full pressure conform 45° branch in a PE/PP piping system has become much simpler and cost-effective.

#### SUPPLY RANGE Code 036

Dimensions	Material
63-225 mm SDR 17	PE+PP
32-225 mm SDR 11	PE+PP
